

**HYDRAULIC MULCHERS FOR
REMOTE CONTROLLED VEHICLES
(35-80 HP)**

MAIN FEATURES

ET/M, ET/FM and **ET/FX** mulchers are built with high-tensile and wear-resistant steels, in working width of 130 cm.

These professional and reliable machines have been designed and manufactured to be operated by modern radio-controlled implement carriers with power between 35 and 80 HP. They can mulch all kinds of vegetation such as grass, bushes, branches and trunks, up to a diameter of about 12 cm.

Berti **ET/M** mulcher is equipped with "D" hammer flails type ("YB" knives on request). It is ideal for mulching grass, bushes and branches up to 6-8 cm. diameter.

ET/FM is a compact forestry mulcher equipped with a double edged 360° swinging-hammers rotor. It is ideal for mulching grass, bushes and branches up to 8-10 cm. diameter.

ET/FX is a compact forestry mulcher equipped with "XF2" fixed-tooth rotor type. It is ideal for mulching brushwood, branches and trunks up to 12 cm. diameter.

Hydraulic piston motor with built-in safety valve

Hydraulic guard/push frame (ET/FM-ET/FX optional)

Skids of wear-resistant steel, adjustable in height

Hydraulic adjustment of rear hood.
